**DETAILED ACTION**

1. This action is responsive to the applicant's amendment filed on 04/07/2008.
2. Claims 2-8 and 10-17 has been cancelled.
3. Per Applicant request claim 9 has been cancelled.
4. Claim 1 is being allowed.

**EXAMINER'S AMENDMENT**

5. An examiner's amendment to the record appear below. Should the change and/or additions be unacceptable to the Applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such amendment, it MUST be submitted no later than the payment of issue fee.

Authorization for examiner's amendment was given in a telephone interview with Stephen A. Terrile, Registration No. 32,946 on 08/2/08. A proposed amendment has been received and adopted by the Examiner - See attached on pages 4-5. Further claim 9 has been cancelled.

***Allowable Subject Matter***

6. The following is an examiner's statement of reasons for allowance:

As applicant pointed out under Remark section, pages 4-5, Metzger et al. (US 7,269,827) taken either singly and/or in combination with other cited prior arts, do not teach scheduling the machine instruction for which an amount by which a size of a committed set of machine instructions upon the scheduling of said machine instruction is smallest relative to the amount by which the size of committed set of machine instruction for machine instruction ready for scheduling would increase upon scheduling of all said machine instructions, identifying descendent machine instructions of each of said machine instructions and determining which of said descendent machine instructions and said machine instructions is not in said committed set of machine instruction and undertaking the method when a risk of registers becoming overcommitted exceeds a certain threshold, said threshold being exceeded when processor register availability drops below a particular threshold as determined based upon a number of registers in use, as recited in such manners in each of independent claim 1.

Prior arts of record do not teach and/or suggest these claimed limitations, thus, all remaining pending claim 1 is allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

1. (Currently Amended) A method of determining an execution order for machine instructions to reduce spill code, said method comprising the step of:

from machine instructions that are ready for scheduling, scheduling the machine

instructions for which an amount by which a size of a committed set of instructions

would increase upon the scheduling of said machine instruction is smallest relative to the

amount by which the size of the committed set of machine instructions for machine

instructions ready for scheduling would increase upon scheduling of all said machine

instructions, said committed set of machine instructions including any machine

instruction that is already scheduled and any machine instruction that is descendent from

an already scheduled machine instruction, for each of said machine instructions ready for

scheduling, said amount being determined by identifying descendent machine

instructions of each of said machine instructions; and determining which of said

descendent machine instructions and said machine instructions is not in said committed

set of machine instructions;

determining an execution order for the machine instructions to reduce spill code,

a given machine instruction being considered ready for scheduling when scheduling of

said given machine instruction as a next machine instruction would not cause an

erroneous programmatic result; and,

undertaking the method when a risk of registers ~~overcommittedness~~ becoming

overcommitted exceeds a certain threshold, said threshold being exceeded when processor register availability drops below a particular threshold as determined based upon a number of registers in use.
